InHealth Technologies® Medicare Assignment Program Products

Medicare Insurance Information

The InHealth Technologies Medicare Assignment Program is for patients who have **Traditional Medicare Part B** as their primary insurance. If you qualify, you can be enrolled in this program.

Enrollment may require 48 hours to process, so please enroll before placing your order to ensure a smooth transaction.

With our Medicare Assignment Program, **you are only responsible for your co-payment**, which is generally 20% plus any remaining deductible. If you have secondary insurance, the co-pay and deductible may be covered, and you would have zero out-of-pocket expense!

Products covered for Medicare Assignment are all types of **Duckbill Voice Prostheses, Low Pressure Voice Prostheses** (excluding special orders), **StomaSoft® Laryngectomy Tubes, HME Cartridges, AccuFit®,** and **HydroFit® Adhesive Housings.**
