

InHealth Technologies® Medicare Assignment Program Products

Medicare Insurance Information

The InHealth Technologies® Medicare Assignment Program is for patients with **Traditional Medicare Part B** as their primary insurance. If you qualify, you can be enrolled in this program. Enrollment may require 48 hours to process, so please enroll before placing your order to ensure a smooth transaction.

With our Medicare Assignment Program, **you are only responsible for your co-payment**, generally 20% plus any remaining deductible. If you have secondary insurance, the co-pay and deductible may be covered, and you would have zero out-of-pocket expenses!

Products covered for Medicare Assignment are all types of **Duckbill Voice Prostheses**, **Low Pressure Voice Prostheses** (excluding special orders), **StomaSoft® Laryngectomy Tubes**, **HME Cartridges**, and **Adhesive Housings**.
