

# Blom-Singer<sup>®</sup> Adjustable Bi-Flanged Fistula Prosthesis

### Leakage Control and Comfort: Two Sizes, One Solution

**The Blom-Singer® Fistula Prosthesis** is a solution designed by Eric D. Blom, Ph.D. is made from medical grade silicone and is designed to reduce leakage of saliva, food and drink around a Hypopharyngeal Fistula. The prostheses come in two sizes, 25mm and 38mm, ensuring a proper fit.

### **KEY BENEFITS INCLUDE:**

**TAILORED FIT:** Available in 2 diameter sizes with adjustable length, to help reduce leakage and improve comfort.

**CONTROL & COMFORT DESIGN:** Features soft, bi-flanged silicone for a secure fit. Healthcare provider insertion and removal without the need for surgery.

**DURABLE AND SAFE:** Made from medical-grade silicone, the prosthesis is designed to withstand 29 days of use. Sterile solution for a single use only.

**COST-EFFECTIVE SOLUTION:** Provides a non-invasive alternative to surgical interventions, offering significant cost savings for both patients and healthcare providers.

**VERSATILE APPLICATION:** Ideal short-term management of the Hypopharyngeal Fistulas, offering flexibility in treatment plans. Translucent to allow fistula tract visualization.
