

The background of the advertisement features a blue-tinted illustration of a child's head in profile, facing right. Two circular callouts are overlaid on the illustration: one on the ear showing the device being used to remove a foreign body, and another on the nose showing the device being used to remove a foreign body. The device is a syringe-like tool with a long, thin, angled tip. The text is positioned in the upper right and middle right areas of the image.

Katz Extractor[®]

Katz Extractor®

OTO-RHINO FOREIGN BODY REMOVER

A quick and simple solution for foreign body removal from the nose or ear.

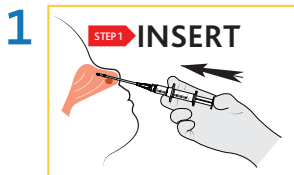

The Katz Extractor® Oto-Rhino Foreign Body Remover is a small, lightweight, single-use device for quick and easy extraction of foreign bodies from the nose or external ear canal. It comes ready to use in a five-pack dispenser box. There are no expensive supplies, such as forceps, hooks or balloon tip catheters/syringes to locate and assemble. No additional suction equipment is required.

To see a demonstration video, visit: www.katzextractor.com

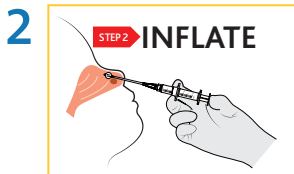

Please Scan to access website and IFU

It takes just three simple steps to complete an extraction with the Katz Extractor!

Insert past foreign body

Depress syringe to inflate balloon

Extract catheter out of canal with balloon inflated
